

Behind the Mask Webinar Series

Webinar Descriptions

January 18, 2024: Fundamentals of a Successful IPC program

Our January 18th, 2024 webinar was the introductory webinar in the NEW webinar Series: *Behind the Mask-Fundamentals of a Successful IPC program*. Robust Infection Prevention and Control Programs are vital in ensuring that patients and healthcare workers are protected from harm and avoidable infections. In a healthcare landscape marked by evolving health challenges, stringent regulatory requirements, and overextended Infection Preventionists, this webinar aims to help IPs understand core principles and essential components of building a successful Infection Prevention Program while empowering IPs to apply identified topics to their practice.
